

SACHINKUMAR KATAGERI

Senior Product UI/UX Designer | B2B SaaS | AI-Driven Products | Enterprise UX

Bengaluru, India | sachin.kumar.katageri@gmail.com | +91-9632818041 | sachinkatageri.github.io | linkedin.com/in/sachinkatageri

PROFESSIONAL SUMMARY

Senior Product UI/UX Designer with 7+ years of experience owning products end-to-end from discovery and user research to high-fidelity delivery and design systems. Proven track record of driving business outcomes: improving retention, reducing drop-offs, and increasing user satisfaction across B2B SaaS, AI-driven platforms, and enterprise applications. Experienced in leading design decisions, mentoring designers, and influencing product strategy in cross-functional teams at scale. Deep expertise in conversational UI, AI workflow UX, and data-driven design.

SKILLS

Core Skills: Product Design, UX Strategy, Design Systems, User Research, Usability Testing, Information Architecture, Interaction Design, Journey Mapping, CRO, A/B Testing, Accessibility (WCAG)

Tools: Figma, Framer, Webflow, Adobe XD, Axure RP, Sketch, Miro, FigJam, Jira, Notion, Zeplin, Storybook

AI Tools: ChatGPT (UX Workflows), Midjourney, Uizard, Figma AI, Figma Make, Adobe Firefly, DALL-E, Gemini Stitch

Frontend Awareness: HTML, CSS, JavaScript, React (Collaboration), Angular (Collaboration), Material UI, Fluent UI

Analytics: Google Analytics, Mixpanel, Hotjar, Microsoft Clarity, KPI Tracking, Funnel Analysis, Retention Metrics

Domain Expertise: B2B SaaS, Enterprise Dashboards, AI Platforms, LMS/EdTech, Workflow Automation, Finance & Banking, Healthcare, Fashion & E-Commerce, Real Estate, Food & Beverage (F&B), Energy & Utilities

PROFESSIONAL EXPERIENCE

Lead UI/UX Designer

Feb 2026 – Aug 2026

Consultant Partners

Remote

- Design UI/UX for AI-based experiences across web and mobile apps.
- Own work end to end: problem framing, user flows, wireframes, high-fidelity mockups, and clickable prototypes.
- Design user-facing AI/LLM features that reduce effort while keeping the user in control, with review, edit, and undo built in.
- Apply vibe coding and modern AI design tools (Claude Design, Lovable, Figma) to go from idea to working prototype fast.
- Build and maintain reusable components, variants, and design tokens so the product stays consistent as it scales.
- Design for accessibility by default: clear labels, keyboard use, focus, contrast, useful errors, and status beyond color (WCAG 2.2 AA).
- Design mobile-first, responsive interfaces that hold up on a phone and adapt cleanly to desktop.
- Produce engineering-ready handoffs a developer can start building tomorrow: flows, states, validation rules, and component specs.
- Collaborate in fast iteration loops with designers, engineers, product, and learning experts to sharpen user flows.
- Bring energy, ideas, and momentum to a small team building real product.

Product UI/UX Designer (Consultant)

May 2025 – Mar 2026

Freelance / Multiple Clients

Remote

- Delivered end-to-end design for enterprise dashboards, SaaS platforms, and AI workflow tools across 6+ client engagements.
- Improved conversion rates through structured A/B testing and CRO initiatives; collaborated directly with React and Angular engineering teams for pixel-accurate handoff.
- Reduced design-to-development cycle time by leveraging AI-assisted ideation and rapid prototyping workflows.

Senior UI/UX Designer

Jul 2022 – May 2025

NuVeda Learning

Bengaluru, India

- Improved user retention by 25% and reduced onboarding drop-offs by 18% by redesigning the LMS platform through iterative usability testing and heuristic-driven improvements.
- Increased overall user satisfaction by 30% as measured by CSAT and NPS across 3 consecutive quarters.
- Architected RBAC flows, modular learning systems, and analytics dashboards for enterprise multi-tenant environments; led design QA ensuring zero regression in production.
- Redesigned 360° feedback module, improving admin workflow efficiency and reporting accuracy adopted by 50+ enterprise clients.
- Conducted UX audits, contributed to product strategy, and received Best Team Player Award (2022–2023).

UI/UX Designer

Jun 2021 – Jul 2022

SuperPilot Innovations Pvt Ltd

Bengaluru, India

- Improved task completion rate by 20% through targeted usability enhancements informed by user testing and behavioral analytics across web applications.
- Designed end-to-end user journeys and reusable component libraries in collaboration with frontend engineering teams.

Web Designer

Sep 2020 – Dec 2021

The Sparks Foundation

Remote

- Designed responsive web interfaces for non-profit initiatives, focusing on UI consistency, accessibility, and cross-device front-end quality.

Jr. Project Engineer

Jul 2019 – Jun 2020

ESPYCONS Software Solutions

India

- Managed project documentation, QA reporting, and delivery workflows; developed early interest in software product lifecycle and interface quality.

KEY PROJECTS

SuperOS — AI Workflow & App Automation Platform | app.autocrud.com

- Designed the end-to-end UX for an AI-powered no-code platform (AutoCRUD) supporting 200+ integrations, multi-agent orchestration, and visual workflow automation.
- Reduced user onboarding friction by simplifying complex agent/flow configuration into a single unified operations dashboard, directly improving activation rate.

MyNuclo — Learning & Marketplace App + Nu360 Enterprise LMS | staging.mynuclo.com

- Owned mobile and web UX for NuVeda's flagship product — integrated AI chatbot, multi-gateway payments (Razorpay, Paytm, PayPal), surveys, and assessments.
- Redesigned Nu360 feedback module reducing admin task time by 30% and enabling structured reporting for 50+ enterprise clients; validated through UX audit and CSAT data.

TestKase — Test Management & Automation for Jira | qa.testkase.com

- Designed UX for a no-code test automation SaaS (SolvionIT) enabling teams to create, manage, and execute tests across projects without engineering dependency.
- Streamlined cross-project test sharing flows, reducing duplicate effort and improving QA team efficiency.

Ortum — AI Coaching Platform MVP | [Figma Live Link](#)

- Led full UX design for an AI-driven coaching platform for industrial/frontline workers — chatbot UX, micro-learning flows, 5-Why methodology, and coach matching/booking system.
- Delivered 49 mobile screens across 8 functional zones; produced MVP deck and UX proposal adopted for investor presentation.

PORTFOLIO

Portfolio: sachinkatageri.github.io

EDUCATION

Bachelor of Engineering – Mechanical Engineering, Navodaya Institute of Technology

CERTIFICATIONS

Professional Diploma in UX Design – UX Design Institute

Responsive Web Design – freeCodeCamp
